Comprehensive Periodontal Evaluation

What is a Comprehensive Periodontal Evaluation? (Diagnostic Code D0180)

The Comprehensive Periodontal Evaluation is indicated for patients showing symptoms of periodontal disease or patients with risk factors such as a history of periodontal disease, smoking, diabetes, and certain medicines such as heart drugs.

This evaluation includes comprehensive periodontal probing and charting to include bleeding points, gingival attachment levels, furcations, mobility, recession and occlusal relationship. It also includes evaluation and recording the patient's dental and medical history and general health assessment. It may include the evaluation and recording of the dental cavities, missing or unerupted teeth, restorations, occlusal relationships, occlusal anomalies or discrepancies and oral cancer screening.
