

To all of my patients:

After moving to Poughkeepsie in 1970 I was very fortunate to develop a dental practice that attracted so many wonderful patients, and friends. But now, after 43 years of providing services for so many people, it is time for me to retire.

The success of our practice was due to several factors. An extremely hard working, dedicated staff, a feeling of honesty and integrity that permeated the office, and of course very loyal and friendly patients. I thank all of you for your support.

At this time, Dr. Andre Grosser will assume responsibility for continuing to provide high quality dental services.

Dr. Grosser has been a general dentist for over 20 years after graduating from Columbia University School of Dentistry he then served in the US Navy and then entered private practice.

I have great faith and trust in his ability to continue to provide excellent dental services to the community.

Your continued confidence in our office is greatly appreciated. Based on over 25 years of professional experience my patients will continue to be treated with the utmost respect and professional confidence.

Dr. Grosser is looking forward to a continued fruitful professional relationship for years to come.

Wishing all of you good health and happiness,

Martin Zweifler DDS
