**PETER H. PRUDEN, D.D.S\*, P.C. & Associates**

\*Diplomate of the American Board of Oral and Maxillofacial Surgery

\*Fellow of the American Dental Society of Anesthesiology

**WISDOM TOOTH "SEASON" IS UPON US**

Your high school and college aged patients are home for the summer months and will be thinking about getting their wisdom teeth out prior to returning school. June, July and August are our most popular times for scheduling third molar surgeries and our office hours accommodate those appointments.

Our surgeons, Dr. Peter Pruden and Dr. Robert Maimone, are both Diplomates of the American Board of Oral and Maxillofacial Surgery and Fellows of the American Dental Society of Anesthesiology and are now scheduling consultations and surgeries so that your patients can arrange to be seen during this convenient time.

**SAVE THE DATE  
and  
SAVE A LIFE!**

Thursday, October 1, 2015  
5:30 pm - 9:00 p.m.

Jason J. Kim Dental Aesthetics

Invitations will be e-mailed and mailed  
in mid August.

**NARCAN TRAINING & LECTURE ON "MARIJUANA & THE ADOLESCENT DENTAL PATIENT"**

The nation and Long Island are facing a drug epidemic which is effecting our youth, our families and our businesses. **NARCAN can SAVE A LIFE!** We are offering the training to all our study club participants so they are informed, trained and able to execute this life saving measure. The training, which meets New York State Department of Health requirements, will enable participants to recognize an opioid overdose, administer intranasal Narcan and take additional steps until EMS arrives. Participants will receive an emergency resuscitation kit that includes nasal Narcan. In addition, Dr. Michael Delman will present an informative presentation on "Marijuana & the Adolescent Dental Patient" discussing the scope of marijuana use and its potency, the effects it has on the developing adolescent brain and the risk of addiction to other "gateway" drugs.

**"GETTING THE EDGE ON REMOVABLES"**

This is an informative lecture for dentists who want to increase removable caseloads with higher profits, better aesthetics and less chair time. The seminar will include comprehensive, proven techniques for high end full & partial dentures including overdentures and the latest in quality materials and procedures will be presented.
