
POST OPERATIVE INSTRUCTIONS FOR CONSCIOUS SEDATION:

It is important to stay hydrated after your appointment. Drink lots of fluids but refrain from alcohol for 24 hours. *Caution -You should not take the prescription pain reliever until 6 hours after your treatment is completed in our office. See post operative instructions for pain control recommendations.

Medications are in your system for 24 hours. Do not drive, operate machinery, care for small children, negotiate stairs unassisted, or make important decisions for the remainder of the day. Your memory will be compromised during this recovery time. This is normal and temporary.

While numb, have liquids only. Avoid hot food or drinks that may burn numb areas.

Post operative care instructions specific to your appointment will be given to you in written form at the time of your appointment.
