

Treatment Advice and Insurance Waiver

The following is a list of advice for dental treatment:

- 1. All treatment should be completed. There are alternatives to the recommended treatment (e.g. temporary treatment).**
- 2. A second, less costly option is better than doing nothing.**
- 3. Waiting on treatment will increase the problems that you presently have. Pain is not a reliable indicator of dental disease.**
- 4. The treatment plan will need to change if additional problems are diagnosed during your treatment.**
- 5. Regular exams, hygiene and gingival (gum) care are needed to prevent tooth decay and periodontal disease.**

I have been informed of the associated in relation to the treatment plans. I agree that I am responsible for all charges for the dental services provided that are not paid by my dental insurance plan (if applicable), unless prohibited by law or the treating dentist or dental practice has a contractual agreement with my plan prohibiting all of a portion of such charges. To the extent permitted by law, I consent your use and discourse of my protected health information to carry out payment activities in connection with this claim.

I have read and understood the above treatment advice and received a copy of the Dental Material Fact Sheet. Furthermore, I hereby authorize and direct payment of the dental benefits otherwise payable to me directly to the dentists of Encore at 32 Dental.
