

TO OUR NEW PATIENTS

We welcome you to our office. We are delighted you have chosen us to care for your periodontal and dental implant needs. It is our commitment to provide you and your family with the utmost in periodontal and dental implant care.

The initial examination will usually be devoted to the following:

Evaluation of your general health to determine any relation to your dental condition. We therefore ask that care be taken in completing the medical history form.

A thorough oral examination to determine the extent of your periodontal problems. An oral cancer screening and an evaluation of your bite may also be accomplished.

For an accurate diagnosis, a full set of x-rays (14 to 20) films may be necessary. If this is not available from your general dentist, we will take the necessary x-rays.

Our policy is to freely discuss our diagnosis and treatment plan with you following the initial examination, and we encourage your active participation. The more you know, the more we can be of service. You will be asked for your insurance card and drivers license. Please have these available when returning completed paper work.

Once again, we are happy to have the opportunity to serve you.

Dr. Raymond J. Steiner and Staff
